

Full Stack .NET Developer (Mid Level)

Defense contractor involved with product development and manufacturing of various systems for military aerospace and vehicles in the Los Angeles International Airport area is searching for an experienced Full Stack .NET Developer. With a 50+ year foundation, The Marvin Group supports all branches of the Department of Defense and allies around the globe on an array of programs and platforms. We support many military prime contractors including Lockheed Martin, Northrop Grumman and Raytheon.

SCOPE

Our mid-level .NET developer will be responsible for building .NET applications using C#.NET focusing on the full stack - front end, business logic, and back end. Primary responsibility will be to design and develop these layers of our applications, and to coordinate with the rest of the team working on different layers of the infrastructure. A commitment to collaborative problem solving, sophisticated design, and quality product is essential.

RESPONSIBILITIES

- Translate application requirements and use cases into functional applications
- Design, build, and maintain efficient, reusable, and reliable code
- Integrate data storage solutions (SQL Server, MS Access, etc)
- Ensure the best possible performance, quality, and responsiveness of applications
- Identify bottlenecks and bugs, and devise solutions to mitigate and address these issues
- Help maintain code quality, organization, and automatization
- Support existing custom applications (mostly VB6 or VB.NET), with the intent to convert them to browser based C#.NET applications

SKILLS / REQUIREMENTS

- B.S. in Computer Science or related or equivalent experience
- 2-4 years experience
- Strong knowledge of .NET web framework
- Proficient in C# (some knowledge of VB helpful)
- Strong understanding of object-oriented programming
- Skill for writing reusable libraries
- Familiar with various design and architectural patterns
- Experience with popular web application frameworks
- Knack for writing clean, readable, and easily maintainable code
- Understanding of fundamental design principles for building a scalable application
- Experience creating database schemas that represent and support business processes
- Experience implementing automated testing platforms and unit tests
- Proficient understanding of code versioning tools such as Git, SVN, and Mercurial
- Must be able to speak/read/write English
- Must be able to lift up to 35 lbs

This position must meet export control compliance requirements. All applicants must be "U.S. persons" within the meaning of ITAR, as defined: a U.S. Citizen, a lawful permanent resident, political asylee, or refugee.

Interested parties, please send resume to jobs@marvineng.com (include job title in email subject line) or Fax 310.671.1256
